Education

Technische Universität Dresden — Dresden, Germany
Master of Science in Computer Science — *Apr. 2026 – Mar. 2028 (expected)*

Bahria University — Islamabad, Pakistan
Bachelor of Science in Computer Science · CGPA 3.38/4.0 (German grade 1.9) — *Mar. 2021 – Feb. 2025*

Projects

Kahawa – Offline Swahili voice reports for farmers: **Whisper** speech recognition and a **Qwen 2.5** LLM extractor on CPU, with a confidence-gated fail-safe that routes unclear reports to a human (**FastAPI**, Docker); World Bank Small AI Hackathon 2026. **Live demo**: kahawa.site

4sight – Early-warning tool that flags which projects are at risk when something changes, like a key employee going on leave (Python, FastAPI, **LLM agents**); **runner-up** at Infineon Venture Hack 2026.

OS Construction – Operating system written from scratch in **C++** and **assembly** that boots on real hardware.

StockGenie – Trading platform that predicts stock prices and analyses financial news as positive or negative for each stock, with strategy backtesting (**Django**, **LSTM**, **FinBERT**).

Experience

RMCAANA Inc. — Remote
Software Developer — *Dec. 2024 – May 2026*

- Built the association's membership platform as microservices with **React**, **Django** and **Flask** on **PostgreSQL**; automating sign-up and renewal grew active members **from 250 to 400**.
- Developed the backend of an observership portal in **Next.js** that takes applicants from application to placement, with automatic emails (**AWS SES**) and document storage (**S3**) replacing manual work.
- Deployed all services on **AWS** (EC2, Lambda, RDS) with **CI/CD** pipelines, and moved the old WordPress site to AWS to lower hosting costs.
- Kept payment and membership flows reliable with **Pytest** suites, **K6** and **JMeter** load tests before the yearly renewal rush, and PostgreSQL index and query tuning.

Sybrid Pvt Ltd — Islamabad, Pakistan
Software Engineering Intern — *May 2024 – Oct. 2024*

- Built **HRBot**, a chatbot that answers employees' HR policy questions from internal documents using **RAG** (**Django**, **React**, OpenAI API); also built the frontend for **KissanBot**, later launched commercially.
- Created a secure audio-streaming platform (**Django**, **HLS.js**) that let the team listen to and transcribe confidential voice recordings without being able to download them.

Technical Skills

LLMs & NLP: RAG, LLM agents, MCP, Whisper, Hugging Face

ML: PyTorch, scikit-learn, OpenCV, CUDA

Programming: Python, Java, C++, SQL, JS

Backend & Cloud: FastAPI, Django, PostgreSQL, Docker, AWS

Languages

English: C1 (fluent) · **German**: A2 (improving) · **Urdu, Punjabi, Saraiki**: Native

Certifications

Introduction to CUDA C/C++ – NHR@FAU & NHR@TUD (Certificate of Attendance) *Mar. 2026*

Machine Learning Specialization – Coursera (Stanford & DeepLearning.AI) *Apr. 2025*

Fundamentals of Database Engineering – Udemy *Mar. 2025*

Volunteering

Stadt.Land.Oase – Idea developer (2025–26) in an **EU co-funded** programme by Haus der sozialen Vielfalt, co-developing art projects on migration and rural life with cultural partners in Saxony.

Interests

Robotics · Boxing · Swimming · Gym & Fitness · Reading · Music
