PROFILE

MSc Computer Science student at TU Dresden with a strong foundation in full-stack web development, AI/ML, and software engineering. Experienced in building production-ready applications using Python, JavaScript, React, Django, and Next.js. Proven track record delivering solutions for international clients and non-profit organizations. Available up to 20 hours per week as Werkstudent, eager to contribute to real engineering challenges alongside studies.

EDUCATION

Technische Universität Dresden

April 2026 – May 2026

MSc Computer Science — 1st Semester

Relevant Coursework: Machine Learning, Data Analytics, Advanced Operating Systems

Bahria University, Islamabad

March 2021 – February 2025

BSc Computer Science — CGPA: 3.38/4.0 · EQF Level 6

Relevant Coursework: Artificial Intelligence, Natural Language Processing, Digital Image Processing

PROFESSIONAL EXPERIENCE

RMCAANA (Non-Profit Medical Alumni Association)

Dec 2024 – May 2026

Software Developer

- Membership Portal:** Architected a React-based membership portal deployed on AWS EC2, driving a 60% increase in active membership (250 → 400 members) through automated registration and renewal workflows.
- Observership Portal:** Building a Next.js 14 + PostgreSQL portal with branching email routing via AWS SES and document storage on AWS S3.
- Digital Infrastructure:** Developed a secure document repository for financial transparency and migrated legacy WordPress systems to high-performance hosting, reducing operational overhead.

Sybrid Pvt Ltd

May 2024 – Oct 2024

Data Science Intern

- AI Conversational Agents:** Engineered Sybrid HRBot using Django/React and a RAG pipeline (ChatGPT API) for policy-based query resolution; developed the frontend for KissanBot, a commercial agricultural AI assistant.
- Media & Generative AI:** Built Django-based tools for secure audio streaming and AI-assisted dataset labeling (AgriVoice); evaluated Stable Diffusion (ToonCrafter) for automated storybook-to-animation workflows.

SELECTED PROJECTS

- StockGenie:** Intelligent stock trading web app with React, Django, PostgreSQL; integrated AI-driven forecasting, FinBERT sentiment analysis, and real-time market data using Redis and Celery.
- Global Talk:** Real-time multilingual chat app built with Flutter, Python, and Firebase; integrated Google TTS and NLP translation between English and German.
- Resume Analyzer:** NLP-based CV analysis tool using cosine similarity and ML to evaluate resumes against employer requirements.
- Crop Recommendation System:** Personalised recommendation engine using decision trees and random forests; deployed via a Streamlit interface.
- Rythmix Web App:** Full-stack music platform in Next.js with WaveSurfer-based audio editing, LLaMA-based LLM and custom AI model for lyrics, instrumentals, and vocals generation.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C/C++, Dart, SQL, GraphQL
Frontend: React, Next.js, Tailwind CSS, Flutter
Backend & Frameworks: Django, Flask, FastAPI, Node.js, REST APIs, Celery, Redis
ML & AI: PyTorch, Scikit-learn, Hugging Face, RAG Pipelines, FinBERT, YOLO, OpenCV, Stable Diffusion
Databases & Cloud: PostgreSQL, MySQL, MongoDB, AWS (EC2, S3, SES), Vercel, Cloudflare
Tools & DevOps: Git/GitHub, Docker, Linux, n8n, Jupyter Notebook

CERTIFICATIONS & AWARDS

Machine Learning Specialization: Coursera (Apr 2025)
Neural Networks and Deep Learning: Great Learning Academy (Mar 2025)
Fundamentals of Database Engineering: Udemy (Mar 2025)
Introduction to Cloud Computing: Coursera (Aug 2023)
1st Place – Project Gala 2023: Bahria University — awarded for exceptional final-year project
1st Place – Speed Programming Competition: Bahria University coding competition (2022)
Certificate of Achievement – NaSCon'23: Fast NU — outstanding contributions

LANGUAGES

English	C1 – Fluent (spoken and written)
German	A2 – Basic, actively improving (target: B1 by end of 2026)
Urdu / Punjabi	Native

AVAILABILITY & STATUS

Work permit	Student visa (§ 16b AufenthG) – authorised up to 20 h/week during semester; full-time during semester breaks
Availability	Up to 20 hours/week; immediate start possible
Location	Dresden – commutable by public transport (Deutschlandticket)
Interests	Book Reading · Gym & Fitness · Boxing · Robotics · Coding · Swimming · Music

Dresden, May 2026
